RE: Software Engineer Intern (Atlanta, GA)

To Whom It May Concern,

I am writing to express my interest in the Software Engineer Internship at Home Depot. My ability as a Web Development Student at General Assembly and my experience as a Home Depot Retail Associate, I believe, makes me an ideal candidate for this position.

As a Web Development Immersive Student at General Assembly, I practice full-stack web development under the instruction of senior software engineers. As a front-end Web Developer I create interactive web based applications that support mobile devices utilizing media queries, API's with an emphasis on DRY principles and RESTful routing. As a back-end web developer I focus on data migration, transformation and scripting. I set-up and administer backups as well as manage hosting environments to support load changes. I optimize applications for speed and security and build reusable code to store in libraries for future use.

Over the course of this program I have worked on multiple projects that demonstrate my ability to use Express.js, Mongo DB, JavaScript, HTML/CSS, Python, Ruby, Mongoose and Object Oriented Programming all encapsulated in an Agile workspace.

As a Flooring Specialist at Home Depot, I primarily focus on customer service and client relations. I hold extensive knowledge about Home Depot products by rotating in different departments such as Appliances, Consumer Applications, Garden, Lighting and Flooring. I provide customer service in a fast paced environment and am able to handle multiple client orders and questions at a time. My job experience at Home Depot Retail will allow me to easily adapt to the corporate environment while keeping Home Depot culture and values in line.

Thank you for your consideration. I am confident my skills and abilities can be a benefit to Home Depot. If you require any additional information, please contact me at 470-269-0564 or email me at paulpellom@gmail.com. I look forward to speaking with you in the future.

Sincerely,

Paul Cody Pellom
